AHMED HUSAIN

LEAD | DATA ANALYSIS, MARKETING & REPORTING INSIGHTS

SUMMARY

Lead analytics professional with 9+ years of experience, including a 5-year track record in data analytics, with the last 2 years specialising in digital marketing analytics. Led end-to-end analytics delivery for GAP Inc. across multiple brands, markets and paid-media channels, running 3–4 projects in parallel and leading a team of 3. Combines hands-on SQL, Tableau and automation expertise with data governance, quality standards and ownership of business-critical reporting.

SELECTED IMPACT

~29 PROJECTS
Delivered end to end across 2025–26 for GAP Inc.

497 → 309
Data feeds audited; ~62% flagged as redundant.

100% CAMPAIGNS TRACKED
New tracking controls ensured every ad campaign's spend was reported.

~70% FASTER QA
AI-assisted validation cut dashboard checks from ~3.5–4 hrs to ~1–1.5 hrs.

EXPERIENCE

Lead - Reporting & Insights / Digital Marketing Analytics
Sep 2024 - Sep 2026

Annalect India (Omnicom) | Client: GAP Inc.

- **End-to-end ownership:** Led analytics delivery for GAP Inc. across multiple brands and markets, delivering ~15 projects in 2025 and 14 new projects in 2026, from requirements through to launch.
- **Data governance:** Designed controls that brought untracked advertising campaigns to zero, and audited 497 automated data feeds, flagging 309 (~62%) as redundant.
- **Legacy problem-solving:** Resolved long-standing projects that had remained unaddressed: removed double-counted data at creative level, implemented business cost logic on raw ad-server data, and fixed time-zone cutoff logic in reporting.
- **Business-critical reporting:** Owned peak-season and Black Friday reporting, the client's most critical sales periods, in 2024 and 2025.
- **Analytical rigour:** Built reconciliations proving numbers matched across source systems, and caught errors in live reporting code that led to verified fixes.
- **Automation:** Turned a manual Excel fee calculation into an automated daily SQL model fed by an API pipeline, matching the original figures exactly.
- **Innovation:** Built capabilities that did not exist before: customer-audience segmentation across 3 social platforms, custom financial-calendar reporting, and a model linking ad spend to website results.
- **Quality standards:** Created QA procedures and reusable validation tools so any analyst could repeat checks, and used AI-assisted validation to cut QA time ~70%.
- **People and technical leadership:** Led a team of 3 as the go-to technical expert, resolving escalations, running knowledge transfer and managing access across 7 advertising platforms.

Business Analyst
Feb 2024 - Mar 2024

Finkraft.ai

- **Financial reconciliation:** Used advanced SQL in Zoho Analytics to reconcile GST 2A/2B, booking and invoice data for enterprise clients.
- **Client impact:** Supported tax-credit (ITC) optimisation and analytics for clients including Abbott India, Bain and McKinsey.
- **Cross-functional collaboration:** Partnered with technology teams on dynamic SQL, parsing improvements and template changes for data-extraction workflows.
